

Ferrous Metal Processing Named Toll Processor of the Year

(Cleveland, Ohio) Ferrous Metal Processing is pleased and honored to announce that it has been selected as the 2021 Toll Processor of the Year in the AMM Awards for Steel Excellence. Ferrous Metal Processing was selected for the Award as part of Ferragon Corporation and its eight divisions

Ferrous Metal Processing Co. provides pickling, hot roll slitting, batch annealing, cold rolling and temper rolling. FMP's processing capabilities work in synergy with its Ferragon sister divisions. Ferragon Corp. is the only steel processing company that can leverage our divisional capabilities to convert hot rolled coils all the way to fully processed AHSS/UHSS steel coils delivered to its customers.

Ferragon Corporation had its genesis in 1983 with the purchase of a batch pickling operation, a slitting line and a cut-to-to line, starting at Ferrous Metal Processing in Cleveland, OH with 8 employees.

Ferragon Corporation is one of the premier flat rolled toll processor in the USA. Offering pickling, slitting, CTL, stretcher leveling, cold rolling, batch annealing, continuous annealing and trucking through our eight divisions, Ferragon supports manufacturing supply chains in industries such as automotive and transportation, energy, appliance, construction, agriculture, mining, metal building, and general fabrication across the Midwest and Southern USA.
