

Ferrous Metal Processing selected as Toll Processor of the Year finalist in the 2021 AMM Awards for Steel Excellence.

(Cleveland, Ohio) Ferrous Metal Processing is pleased and honored to announce that it has been selected as a finalist for the 2021 AMM Awards for Steel Excellence in the category of Toll Processor of the Year. Ferrous Metal Processing was nominated for the Award as part of Ferragone Corporation.

Ferrous Metal Processing Co. provides pickling, hot roll slitting, UM leveling, batch annealing, cold rolling and temper rolling. FMP's processing capabilities work in synergy with its Ferragone sister divisions. Ferragone Corp. is the only steel processing company that can leverage our divisional capabilities to convert hot rolled coils all the way to fully processed AHSS/UHSS steel coils delivered to its customers.

Ferragone Corporation had its genesis in 1983 with the purchase of a batch pickling operation, a slitting line and a cut-to-to line, starting at Ferrous Metal Processing in Cleveland, OH with 8 employees.

Today, with over 200 employees and processing more than 1.2 million annual tons, Ferragone Corporation is the premier flat rolled toll processor in the USA. Offering pickling, slitting, CTL, stretcher leveling, UM leveling, cold rolling, batch annealing, continuous annealing and trucking through our eight divisions, Ferragone supports manufacturing supply chains in industries such as automotive and transportation, energy, appliance, construction, agriculture, mining, metal building, and general fabrication across the Midwest and Southern USA.
